Résumé - Alp Erkin Cakmak

Music Composer and Sound Designer

I am a composer with 20 years of experience arranging and producing musical works and a sound designer candidate. I have familiarity with a variety of musical genres, with particular expertise in composing, mixing, and implementing.

Education

Virtual Composer and Sound Designer

aug. 2022 - jun. 2024

Östra Grevie Folkhögskola, Vellinge

Postsecondary vocational training in composition and sound design. Several courses in DAWs and sound engines, as well as mixing, mastering, sound cards, microphones, and recording. Two lengthier partnerships with students at The Game Assembly as audio director on major game projects.

Advertising & Public Relations

sep. 1989 - jun. 1998

The Faculty of Communication Sciences, Anadolu University-Turkey

The aim of communication arts education was to increase media professionals' qualifications and to train human resources for local, regional, and national media organizations, as well as corporate communication departments. I was trained as an advertising and public relations professional, but during my studies, I was able to better myself even more in the art of communication and music, for which I am grateful.

Work experience

Since 2005, I've been writing music for television series, films, documentaries, promos, and advertisements, and I intend to continue doing so.

In 2017, I focused on voice acting. I am currently voicing approximately 16 different characters in our puppet show for children, which is broadcast on YouTube. I also continue to perform voice-overs in a separate puppet show for adults.

After all these years, I returned to school in the year 2022 and began studying Virtual Composer and Sound Designer at Östra Grevie Folkhögskola in Vellinge, Sweden.

Awards and Recognitions

* In 2006 I won the Apple I-can music award for professionals.

* In 2013 I won the Golden Butterfly Award for the popular TV series "Merhamet" for Best Music.

Expertise

Composition, sound production, mixing and mastering in DAWs.

Implementation with audio engines.

Sound recording and arranging.

Voiceovering and Singing.
